

## Programming Assignment 5

*Arindam Karmakar*

## 1 Build a complete binary search tree

Consider an sorted array a shown below. Write a C program that will create a almost complete binary search tree whose nodes will be the elements of the given array.

-5	0	2	4	9	13	14	15	22
----	---	---	---	---	----	----	----	----

For example the output tree for the above array will be,
